Profile Summary

Frontend Developer with hands-on experience building and maintaining modern web applications using React and JavaScript. Proficient in developing scalable frontend architectures, integrating applications with backend services, and consuming RESTful APIs for real-world business workflows. Experienced in creating reusable components, managing application state, and collaborating on production-grade dashboards and core modules. Passionate about building clean, maintainable, and scalable software while delivering efficient, user-focused solutions.

Experience

Frontend Developer, Ryde Consulting Apr 2026 – Present

- Developing frontend modules for qnaHub, a full-stack certification exam platform that helps users prepare for certification exams, interviews, and skill assessments.
- Implemented server-state management with TanStack Query, using caching and query invalidation to keep exam and dashboard data consistent.
- Built role-based user flows (user registration with OTP verification, login, password reset) with JWT authentication using HTTP-only cookies and protected routes for users and admins.
- Integrated REST APIs for CSV question import and AI-powered question generation (Google Gemini) into the admin dashboard.

Trainee Software Engineer, CognitionX Logic Pvt Ltd Jan 2026 – Mar 2026

- Designed and implemented a universal update mechanism to handle shared state updates across modules, eliminating repetitive conditional logic.
- Reduced code duplication by ~40–50% by abstracting common update patterns into reusable functions.
- Improved codebase maintainability and scalability, reducing bug resolution time by ~30%.

Projects

qnaHub – Certification Exam Platform Live Demo

Frontend: React, TanStack Query, React Router, Tailwind CSS, Radix UI

Backend & Deployment: Node.js, Express, MySQL, Hostinger

- Developed a full-stack certification exam platform where users browse exams, take timed tests, and track results and performance history.
- Built an admin dashboard for managing users, exams, and questions.
- Deployed the React frontend and Node.js/Express backend on Hostinger, configuring environment variables, the MySQL database, and cross-origin cookie-based authentication for production.

The Wild Oasis – Cabin Reservation Platform Live Demo

Tech Stack: Next.js (App Router), React, Tailwind CSS, NextAuth.js, Supabase

- Developed a full-stack boutique hospitality platform with dynamic React UI components, using Next.js Server Components and Server Actions.
- Implemented secure social authentication and profile management using NextAuth.js.
- Integrated Supabase (PostgreSQL) to store and manage cabin and booking data.

Skills and Technologies

Frontend Technologies: React.js, Next.js, TanStack Query, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Technologies: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB, Supabase, Prisma

Programming Languages: JavaScript, TypeScript, Python, C++

Frameworks & Tools: Frappe, Git, GitHub, VS Code, Visual Studio, Hostinger, Vercel

Internships and Certificates

Software Engineering Intern, CognitionX Logic Pvt Ltd Jul 2025 – Dec 2025 [Link](#)

- Issued: Dec 2025
- Skills: React.js, Frappe Framework, ERPNext, Doppio

Education

Loganatha Narayanasamy Government College, BSc Computer Science June 2022 – May 2025

CGPA: 7.5/10.0
